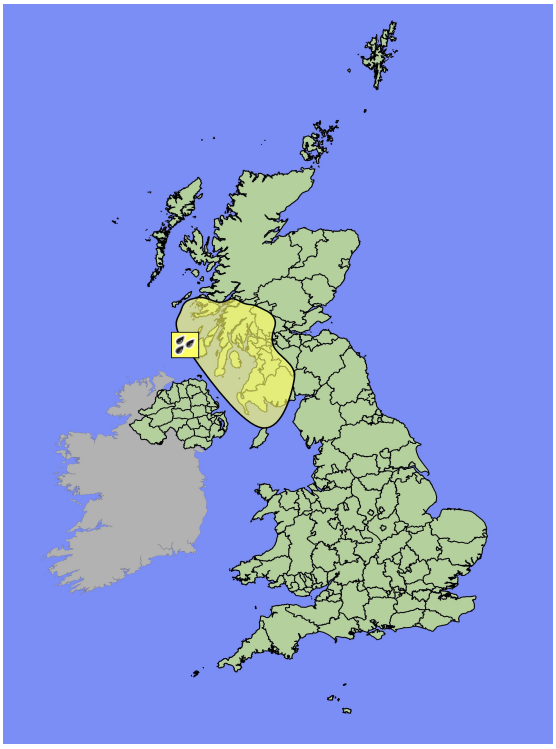
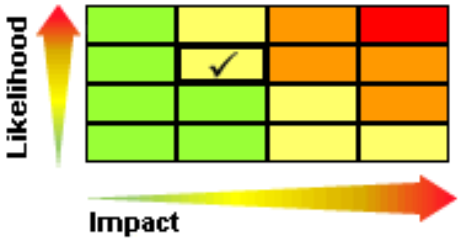
National Severe Weather Warning Service





Chief Forecasters Assessment
A frontal system associated with a deepening depression, will affect the UK later on Sunday and particularly during Monday. The heaviest and most persistent rain is expected over western regions, with widespread accumulations of 20 to 40 mm over parts of western Scotland and Cumbria and locally 60 mm or more over higher ground. Some localised flooding is possible in parts of southwest and western Scotland.

Conditions will also be windy, with gusts exceeding 50 mph over some exposed western coasts and hills.

The Met Office have issued a **Yellow Alert** of **Rain**

Valid from **01:00 on Mon, 19th Nov 2012** until **18:00 on Mon, 19th Nov 2012**

A spell of heavy rain, accompanied by strong to gale force winds, will start to affect the region during late Sunday evening and persist well into Monday, before clearing later.

The public should be aware of the risk of localised flooding.
